DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a therapeutic agent comprising stanniocalcin.

Group II, claim(s) 13-20, drawn to a method of treating obesity by administration of a therapeutic agent comprising stanniocalcin.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of stanniocalcin as a therapeutic was known in the art prior to the instant application (as evidenced by Olsen et al. Proc. Natl. Acad. Sci. USA, 93: 1792-, 1996). Claim 1 recites that the therapeutic is “for obesity”, however, this recitation places no material limitations on the therapeutic, and therefore, the technical feature of stanniocalcin as a therapeutic is present in the art. Because only those features which define

over the prior art can be considered "special technical features", the instant claims lack a corresponding special technical feature, and the inventions lack unity of invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion
